

Model Selection and Architecture Design

Model Selection & Architecture Design

=====

Checklist:

- ☐ Selected model (Gemini Pro / Flash / Vertex AI)
- ☐ Reason for model selection
- ☐ System architecture diagram
- ☐ Workflow design (User -> Prompt -> Model -> Output)
- ☐ API integration architecture
- ☐ Token/context handling
- ☐ Libraries & tools used
- ☐ Scalability considerations

MedSafe specifics:

- AI usage: backend/services/ai_client.py (chatbot, summarizer, extractor, alternatives explanation)
- Workflow: Frontend -> FastAPI -> ai_client / rxnav -> response
- Document which model is used (e.g. Gemini), why, and any limits (context length, rate limits).
