

Scalability and Future Plan

Scalability & Future Plan

=====

Project: MedSafe

Current scale

[Single user / local deployment; no auth; session-based if any]

Scalability considerations

- [] Horizontal scaling (multiple backend instances)
- [] Caching (e.g. RxNav responses)
- [] Rate limits and quotas (API keys, RxNav)
- [] Database for history (if added)

Future plan

- [] Feature: [e.g. user accounts, saved checks]
- [] Feature: [e.g. more data sources]
- [] Deployment: [e.g. cloud hosting]
- [] Improvements: [performance, UX, prompts]
