

Testing and Evaluation

Testing & Evaluation

=====

Checklist:

- ☐ Functional testing
- ☐ AI output validation
- ☐ Edge case testing
- ☐ Performance testing (latency)
- ☐ Output quality evaluation
- ☐ User testing & feedback
- ☐ Bug fixing
- ☐ Evaluation metrics

MedSafe specifics:

- Test: interaction check (2+ drugs), extract (sample Rx text), alternatives (known drug), chatbot (app question vs medical question)
- Validate: chatbot refuses medical advice; interactions come from RxNav
- Edge cases: unknown drug names, empty input, API timeout
- Document latency and any evaluation metrics used.
